Microsoft Downloads:

This course uses Microsoft software available at no charge through the Microsoft DreamSpark program. You should have received notification of your access to this program when you first registered for a course in the Volgenau School of Engineering. If you can't find that notification email, please read the DreamSpark FAQ on <http://labs.vse.gmu.edu> for instructions on activating your account or resetting your password.

Visio:

Visio is a Microsoft Office product that you should all be familiar with.

Visio can be purchased @ the Mason Computer Store @ a reduced price, you can use the free Visio viewer (with limited functionality), you can use any of the open Mason computer labs since they all have Visio, Mason Virtual Computing Lab (<http://www.vcl.gmu.edu>) , or you can obtain Visio through **Microsoft Downloads**.

Va. Cyber Range (VaCR)

You will receive an email from the Va CR. Please log in and confirm your account. The VaCR. The VaCR will be used during the semester. You will also need an Ubuntu VM that where you can attached removable devices.

VSE Labs:

All software required for this course is installed on computers in the open student lab in ENGR 1506. Lab hours can be found on the Labs web site, <http://labs.vse.gmu.edu> . Please remember to save your work to an external drive as any data stored on those computers will not persist after a reboot.

Virtual Computing Lab:

Software for this course has been installed on the Mason Virtual Computing Lab (VCL), run by Mason's ITS. The VCL allows you to run remote sessions through your own computer. You can initiate a VCL session through <http://www.vcl.gmu.edu> and that site also has a link for instructions on its use. Please remember to save

all of your work on a drive separate from the virtual machine as the entire virtual machine disappears after you exit.

Software downloads:

The Volgenau School subscribes to Microsoft's DreamSpark and VMWare's Academic programs which offer free software downloads to our students. All students in VSE eligible courses receive an invitation to each of those programs at the beginning of their first semester in which they are registered for an eligible course. If you can't find that notification email, please read the relevant Student FAQ on <http://labs.vse.gmu.edu> for instructions on activating your account or resetting your password. Microsoft does not make Mac versions of most of its software products. If you have a Mac, you will have to use Boot Camp, VMWare Fusion, or a Virtual Machine product and then install Windows. Volgenau School students may obtain a renewable one year license for VMWare Fusion through a program sponsored by the Volgenau School. Information on that program is in a FAQ on <http://labs.vse.gmu.edu>. There are also some hints for Mac users on getting Microsoft Windows in the Macintosh Tips FAQ. Other software downloads, including anti-virus software and SSH clients, can be found on the Mason ITS site at <http://itservices.gmu.edu/downloads/index.cfm>.
